Photoshop's History Photoshop's original version was Photoshop 1.0 in 1987. The program was first available for purchase at \$995, or \$1295 if you also purchased Photoshop Painter. In 1990, Adobe released Photoshop 1.1. Photoshop 1.1 is the first version of Photoshop that allows more than one document to be open at a time and features a set of basic features, including editable layers, the ability to control fill and stroke, and undo/redo capabilities. Photoshop 1.2 was released in 1991, offering better tools for typography, an improved layer system, extensive guided image editing, and support for 5.5-inch floppy disks. In 1992, Photoshop 1.3 was released, improving on Photoshop 1.2 by improving the workspace, moving the save function to the File menu, and including the perspective image tools. Photoshop 1.4 was released in 1993, and introduced the Histogram display, the Layers palette, and the Annotate panel. Photoshop 1.5 was released in 1994, and Photoshop 1.5 features the Gradient palette and the Object Layer. The ImageReady program was used to provide the transparency and clipping features, and was originally used on 8-inch floppy disks. Photoshop 1.6 was released in 1995, and adds the Composite overlay, a tabbed interface, a Merge option for multilayer images, a Transparency checkbox for layers, the Content Aware fill tool, the Shadow Selection tool, the Vector filter, and the Magic Wand tool. Photoshop 1.6 is also the first version to display a "Help and Resources" button near the bottom of the screen, and it supports the TIFF format, which is the default format for digital cameras. Photoshop 2.0 was released in 1996, and adds features such as the Adjustment Layers, the Quick Mask command, the Content-Aware Patch tool, the Color Picker, the Audio Mixer, the Layer Masks Tool, the Shadows/Highlights control, the Gradient Editor, and the Smooth control. The new Photoshop 2.0 also supports the GIF, JPEG, and TIFF formats. Photoshop 2.1 was released in 1997 and adds the ability to create page-sized documents, add effects via filters and overlays, and better support the GIF, JPEG, and TIFF formats. In 1998, Photoshop 3.0 was released, which adds improved printing, the ability to batch create PDF

Adobe Photoshop Elements is a good option for a family or personal photographer who is looking for simplicity, productivity and an ability to make a simple change with no fuss. It's very good for image manipulation. You can even save your images in the RAW format. Steps to improve productivity in Adobe Photoshop Elements Take better photos Photoshop Elements is good if you're willing to spend a bit of time learning how to get the best out of this app. For most people, the best option is to buy a high-end camera or take photos with a simple smartphone camera. For extra-simple shots, you can use Photoshop Touch app that's available for both iOS and Android. You'll need to get more creative with the images than you would with a "standard" camera. If you take a hundred snaps and spend 10 minutes on each one, it's time consuming and a chore. If you want to create your own images, you can check out the Procreate app that helps you create a large number of standard photos with ease. To start saving money on editing costs, you can take steps to save time and reduce the amount of time you spend editing your photos. This will make you more efficient at what you do, saving you time in the long run. Reduce the number of photos you take There's a chance that you might not realise the amount of time you spend taking photos of your children, pets, or pets' children. If you spend hours taking photos and only look at a handful of them, you might not spot things that you like. It's better to spend the time that you spend taking photos creating your own images, or working on your own photos. That means you spend less time taking photos and more time editing them. You can do this by learning some camera skills, or use your phone to snap photos and just edit them. You can use apps such as Super Snapse, My Good Snaps and Snappie to help you. These help you take a large amount of photos and make them a lot easier to edit and view. Creating images yourself will also enable you to learn more about how to achieve different looks. Use the "noise" feature Noise is created when details that are sharp aren't

ORLANDO, FLORIDA — An Orlando man who had been charged with “swatting” threats to police and a school was released from jail after police noted evidence that his claims were false. According to the Orlando Sentinel, an Orange County judge on Thursday night ordered the Orange County Sheriff’s Office to release Jameel Ades of Orlando after he claimed he would turn a gun on a police SWAT team. The judge found that there was no evidence that Ades was in possession of a gun, and that he posed a threat to public safety. Sheriff’s officials believe that Ades, who they say is associated with a group of other swatters, had been playing with the idea of alerting law enforcement of phony threats — all for kicks.

Time in the Kingdom By Stephen Singular Is there time for philosophy in the kingdom of God? In a church which prides itself on being a “sign-following kingdom”, and one which has a strong biblical and missional emphasis, I want to ask whether or not there is time to think about things like this. Do we have a vocational theology? Some Christians are quick to say that philosophy is dead and a box full of broken toys. But this is to have it the wrong way round. The vestments of the Protestant faith have been worn away. Some would say that the whole point of the Reformation was to get rid of them. Luther said that to be a Calvinist was tantamount to being a monk. The Reformers fought against medieval scholastic theology. They said this was academic babble. If God has changed, if the King has changed, if the church is changed, if we don’t go the way of the Buddhist monk who regards all things as a sacred contemplation of the eternal, then why should our theology be any different? There is time for thinking, and not just in the Christian world. How can we speak of God’s economy if we cannot accept that there are different ways to view the world and the economy? In Jesus, the kingdom of heaven is more than a theological concept. It is about the kingdom of power, it is about the kingdom of power at work in the world. We live in a world which is subjected to a great many powers, and these powers really do drive the economy. Both the state and the church are subject to those powers, and if they are not subject to those powers, then they are not serving God. There is also time for thinking, and not just in the world of academia. I don’t have any objection to my parents reading the newspapers, or to my children watching television programmes. But to think that what we are seeing in the world is the Kingdom, or to believe that the world of politics is in some way the way that we as Christians are to relate to politics, is really opening up a can of worms. We should be able to see the world in its different aspects, and to be able to make judgments about what is relevant to the Christian. We don’t have to engage in the New Atheism, we don’t have to say that the Christian faith is not a good one. No, that is
